

NEC Collaboration powered by ThinkHub

NEC Collaboration powered by ThinkHub is a collaboration tool designed to help you ideate, collaborate, and innovate. By consolidating all the moving pieces of a brainstorming session, ThinkHub works with the same devices, content and software that you already use - meaning almost zero set-up time to initiate ThinkHub Sessions, and more efficient and productive meetings with your peers.

FEATURES + BENEFITS

1 CANVAS

The ThinkHub Canvas is the digital backdrop for your ThinkHub Sessions, and can expand up to 20 times the surface area of the physical touchscreen. Use touch gestures to navigate the Canvas. Enjoy the ability to write directly on the Canvas, and pinch-zoom to visualize process flows or connect different ideas in your Session.

2 CANVAS KEY

The Canvas Key is located in the upper left corner of your ThinkHub Canvas. In addition to using the Canvas Key as your visual aid, you can tap directly on the Canvas Key to quickly navigate to areas of the Canvas.

3 DYNAMIC MENU

Tap and hold anywhere on the Canvas to unlock your session tools. Open any of our built-in apps (Note, Sketch, Web Browser), draw directly on the Canvas, undo actions on the Canvas, and Save/Open/Email/Print your ThinkHub Sessions.

4 WEB BROWSER

The ThinkHub Web Browser is optimized for multitouch, multiuser group use. Drag and drop the Web Browser onto the Canvas to move, pinch-zoom, and annotate web-based content.

5 NOTES

Notes can be color-coded to help categorize or label certain groups of content. Use Notes to jot down quick ideas. Access Notes anytime from the Built-in App Tray, or via the dynamic Menu.

6 SKETCH

Open a Sketch to create a quick drawing on the ThinkHub Canvas. Use the built-in annotation tools to select different pen weights, colors, take snapshots, and more. Access Sketches anytime from the Built-in App Tray or via the Dynamic Menu.

7 DEVICE TRAY

All connected devices will appear in the Device Tray. Each device will display as a preview thumbnail until you tap or drag the thumbnail to share to the Canvas. At the base of the preview thumbnail, the name of the device displays as overlay text for additional reference.

8 AUTOPRESENT MODE

Toggle 'Auto On / Auto Off' to automatically display device screens to the Canvas when connected. When AutoPresent Mode is on, anyone who connects their device to the Canvas will automatically be displayed in full-screen mode.

9 THINKHUB HELP

Anytime you need a refresher on your ThinkHub tools, you can access ThinkHub Help by tapping the question mark icon located in the center of the bottom tray of the ThinkHub Canvas.

10 MEDIA TRAY

All media files live within the Media Tray. This includes images, videos, and PDFs. To load your files to the Media Tray, simply plug in a USB drive to your ThinkHub USB port. Once you've plugged in your USB drive, your content will automatically load into the Media Tray with thumbnail preview windows. To share the content to the Canvas, simply tap or drag file thumbnails.

11 T1V AIRCONNECT APP

T1V AirConnect enables you to connect any laptop or mobile device wirelessly to the ThinkHub Canvas. T1V AirConnect supports Mac OS, iOS, Linux, Android, and Windows. Once you have installed AirConnect on your device, you will be prompted for your AirConnect Key or IP Address. You can reference the top right corner of the ThinkHub Canvas for this information.

Retail

Allow your shoppers to design their own kitchen, wardrobe, car interior, anything...with NEC Collaboration powered by ThinkHub. NEC Collaboration powered by ThinkHub enables associates and customers to deliver incredible customer experiences.

Home goods retailers can prepopulate NEC Collaboration powered by ThinkHub with products for associates to recommend to their customers. To further improve the in-store exchange between associate and customer, customers can quickly share their devices to the ThinkHub Canvas, where they might have images of their current kitchen or bedroom they wish to redesign. For a design consultation, this presents a ripe opportunity to understand the customer's aesthetic and deliver real-time recommendations of products.

In fashion retail, associates can work with customers to piece together 'looks' for the season, dragging and dropping pre-populated clothing items from the Media Tray onto the digital Canvas. Customers can compose entire wardrobe selections, while associates can add annotations with custom details or requests to deliver a superior customer experience.

In car dealerships, associates can work with their customers to tailor the interior and exterior of the car of their dreams. Customers can experiment with different options in real-time, so they can more easily visualize their future car on ThinkHub's large-format Canvas.
