**NEC DISPLAY SOLUTIONS NP4100W PROJECTOR RECEIVES
TOP HONORS AT INFOCOMM 2011**

***Rental & Staging Systems Readers Select NP4100W as
Best Projector in 10,000 Lumens or Less Category***

CHICAGO – June 20, 2011 – [NEC Display Solutions of America](#), a leading provider of [commercial LCD](#) display and [projector](#) solutions, announced today that its NP4100W widescreen professional installation projector was recognized by the readers of *Rental & Staging Systems* as the Best Projector in the 10,000 Lumens or Less category at [InfoComm 2011](#), the largest audio-visual tradeshow in the world.

At 5500 ANSI lumens, the [NP4100W](#) has the ability to display a high level of brightness, making it appropriate for larger than average screen sizes and rooms with minimal lighting control, such as auditoriums, training and network centers. Its DLP® light engine ensures great contrast and fast video response times, thereby creating incomparable image quality. The NP4100W is designed to be utilized in 24x7 applications, and its dual- or single-lamp operation helps extend lamp life.

“The readers of *Rental & Staging* use projectors from all manufacturers in virtually every conceivable venue,” said Keith Yanke, Director of Product Marketing for Projectors and Large-Screen Displays at NEC Display Solutions. “To receive recognition as the top projector from this segment of the industry is truly an honor for NEC Display Solutions and speaks volumes to the quality of the NP4100W projector.”

This marks the fifth consecutive year that NEC has received an InfoComm award. Last year, the NEC X461UN-TMX4 video wall bundle solution was honored with the Best Plasma or LCD Display, and NEC's [VUKUNET](#) platform was selected as one of the Most Innovative Digital Signage Products. In 2009, the [LCD8205](#) won the award for Best Digital Signage Product. NEC's 65-inch MultiSync® LCD6520 earned top honors in the category of Best Plasma or LCD display in 2008, after the company's 60-inch PlasmaSync® 60XM5 professional plasma display took home the same honor at the 2007 event.
